Are varicose veins keeping you from wearing clothes that show too much leg? You're not alone. More than 40 million Americans suffer from unsightly and sometimes painful varicose veins that can strike anyone at any age, and can lead to serious medical issues. Luckily, there are treatments that can help.

Our speaker is Dr. Jie Mao, who has treated more than 500 patients with varicose veins. She'll explain the causes of varicose veins and how they can lead to serious health problems. Then she'll describe self-care measures and the latest treatment options such as outpatient laser and radio-frequency procedures.
