Advanced Treatment for Cataracts

Vision that is cloudy from cataracts can put a damper on quality of life. Fortunately, with recent innovations, it's possible to enjoy clearer vision once again.

Laser cataract surgery improves the precision and accuracy of cataract removal. When combined with modern lens implants, this new procedure may improve vision for those with cataracts — and potentially reduce the need for glasses.

Come hear a board-certified ophthalmologist describe this advanced treatment option for cataracts.

- When** Tuesday, June 7, from 11 a.m. to noon
Speaker Richard Stewart, MD, MSPH, with Specialty Eye Care
Where Calvary Bible Church, 3245 Kalmia Ave., Boulder
