Advanced treatment for Parkinson's disease

When Monday, Sept. 19, from 2 to 3:30 p.m. (Mountain Time)

Where Watch online. You'll get the link once you register.

Speaker Kara Beasley, DO, MBA, MBE, FACOS, of Boulder Neurosurgical and Spine Associates of BCH

Parkinson's disease is one of the most common movement disorders, affecting more than 1 million Americans. Often, medications can greatly control symptoms. But when they fail to provide consistent and adequate symptom relief, Deep Brain Stimulation (DBS) can help control your symptoms and enable you to live a more active lifestyle.

Hear board-certified neurosurgeon Kara Beasley, DO, MBA, MBE, FACOS, describe DBS—an advanced, minimally invasive surgical treatment for Parkinson's disease.

PARKINSON'S ACROSS AMERICA Raising Awareness for Parkinson's Disease

Parkinson's Across America spokespeople Scott Rider and Jim Morgan will join the presentation. Jim has received the DBS treatment and will discuss his experience, as well as answer any questions you may have.

RESERVATIONS REQUIRED:
