Innovative treatments for atrial fibrillation

When Tuesday, Oct. 25, from 6:30 to 8 p.m. (Mountain Time)

Where Watch online. You'll get the link once you register.

Speakers Maria Anderson, MD, cardiac electrophysiologist
Srinil Iyengar, MD, interventional cardiologist
Oussama Lawand, MD, FHRS, cardiac electrophysiologist

AFib increases your risk of stroke by 5 times.

Atrial fibrillation (AFib) is an irregular heartbeat that can be dangerous because it increases your risk of stroke by nearly fivefold and also makes you more prone to develop heart failure and other heart-related complications. Luckily, recent years have seen major advancements in treating AFib.

Hear top experts from the AFib Clinic at Boulder Heart describe a range of innovative treatments for bringing your heart back to a normal rhythm, including lifestyle changes and minimally invasive procedures such as catheter ablation and the new WATCHMAN.
